Dr. Anitha Selvaraj

MBBS, MS (Obstetrics & Gynaecology)
Reg. No. DEMO-TN-31556

Patient: **Divya Ramesh** Age/Sex: **34 / F** Date: **16 September 2026** OPD No: **KWC-7734**

Diagnosis: **Heavy menstrual bleeding · Iron deficiency anaemia (Hb 9.1)**

R

Medicine	Strength	Frequency	Duration
Tab. Traptic MF	500 mg	Thrice daily — during periods	5 days
Tab. Meftal Spas	250 mg	As needed for cramps	SOS
Tab. Livogen	100 mg	Once daily — after lunch	3 months
Tab. Folvite	5 mg	Once daily — morning	3 months

Advice:

- Take iron with lemon juice or orange, not with tea, coffee or milk.
- Iron and calcium must be at least four hours apart.
- Repeat haemoglobin after 8 weeks.
- Return sooner if bleeding soaks more than one pad an hour.
